ST7	-	-	632.89	2
125P	-	-	632.89	2

The period between empties will be dependant on loading. It is recommended that any plants 6P, 10P, 16P be emptied ONCE a year IF under 80% loading.

Plants 25P, 40P, and 55P should be emptied a minimum of twice per year unless they are loaded above 60%. If loading above 60% it may require emptying 4 times per year.

75P upwards will probably require a minimum of 4 emptying visits per year unless it has a primary tank. If a primary tank is installed empty primary twice and plant once.
